Item code	<b>ENGRAVING</b>
EAN	<b>5907311002882</b>

### Product description

Upon request, we provide engraving service on the inner wall of the chess case or chess field. If you choose a chess field, please specify on which field the engraving is to be made (engraving on A1 or H8 fields looks best). **We engrave inscriptions, logos, graphics, etc. sent by the customer.**

To order an engraving, **just add it to your cart** as a regular product **and in the comments to the order send the exact content**, which is to be engraved on the chess set.

Some sets, due to the contoured shape of the chess case, give the possibility to apply the engraving only on the chess field (e.g. CH104).

The maximum size of the chess case on which we can make an engraving is 60 cm.

The review photo shows an example of an inscription made on a chess case of the Ambassador model (cat. no. CH128).

If the engraving was to be made in several places, for example, on 2 different inner edges and the chessboard field, for each place the engraving service must be purchased separately (in this case, we put 3x Chess Engraving in the cart).

We accept only payment in advance for engraved products.

#### Attention:

**Product covered by engraving service (made on Customer's order) or product made on Customer's order is not returnable due to personalization made**
