### Product description

Tournament chess board without description inlaid with maple or sycamore, which has undergone an ebony process. This gives the chess board an unusual appearance similar to chess boards made of precious ebony. It is a wonderful alternative to chessboards made of wenge wood.

The chess board, with an overall size of 52x52cm, has light and black fields of 55x55mm and is ideal for our medium and large pieces in sizes 3.5"-3.75" and Staunton No. 5 Staunton Figures and No. 6 Staunton Figures

There are 4 felt pads on the underside of the chess board to ensure it moves smoothly and remains stable on a table, desk or other hard and level surface.

Chess boards are widely recognised as professional chess boards. Most chess tournaments are played on chess boards with fields ranging from 50 to 58mm, international tournaments nowadays - on electronic boards.
