Product description

Chess pieces made of plastic, weighted and metalized so that they look like cast from shiny metal. Stylized as figures from the era of the Roman Empire. The height of the king is 98 mm, the figures look great on both chessboards made of artificial materials and wood.

They are glued on the bottom with felt to protect the chessboard against scratches and make it easier to move the pieces along its surface.

Taking into account the size of the figures, they are ideal for folding plastic, cardboard and vinyl chessboards with an area of 55 - 58 mm, e.g.

CHTX55 PHM

or

Plastic foldable chessboard no. 6, white and brown

The set includes 32 chess pieces (16 pawns and 16 chess pieces in both colors).

Chess pieces styled after the Roman Empire in elegant black and gold tones exude refined luxury. Each figure is carefully loaded with metal details, emphasizing their exclusive character.

Our chess pieces are the essence of the highest quality, ensuring not only precision of movements, but also aesthetic perfection. Each figure is a masterfully crafted work of art, combining solidity with elegance. If you strive to play at the highest level, our pieces are unmatched.

Don't hesitate, invest in the perfection of chess gameplay and get a unique chess set styled after the Roman Empire today.
