Manufacturer	Sunrise Chess & Games

Product description

Tournament chess board without description inlaid with maple or sycamore, which has undergone the process of ebony. Thanks to this, the chess board has obtained an extraordinary appearance similar to chess boards made of precious ebony. This is a great alternative to chessboards made of wenge wood.

The chessboard with the overall dimensions of 36 x 36 cm has squares of 38 x 38 mm and is ideal for our smaller chess pieces in the size of 3" or Staunton No 4. Staunton No 4 Pieces

There are 4 pads on the bottom of the chessboard, which ensure its stability on a table, desk or other hard and even surface. Chessboards are widely considered to be professional chessboards. Most chess tournaments are held on chessboards with squares ranging from 50 to 58 mm, international tournaments currently, mainly on electronic boards with squares of 55 mm.

The pieces visible in the photo are not subject to the offer and can be purchased separately in our chess shop.
