### Product description

The latest DGT 1500 electronic chess clock is designed for high-speed chess games. A unique feature of this model is an additional position on the display showing tenths of a second. This is very helpful when every second counts. The large and clear display is ideal during intense games.

The easy setup process allows players to start playing quickly, making the DGT 1500 the best choice for quick games. An important feature of the timer is the ability to set different times for each player.

The timer's state-of-the-art electronics are designed for exceptional performance, so it can easily run on just one battery. This feature only emphasizes its convenience and low maintenance costs.
