Product description

When a chess master finds a winning strategic idea it is seldom by accident.

An amateur, staring at a position on the chess board is often fumbling in the dark, his head spinning with a multitude of general rules and vague notions. The master's approach is concrete. He knows how and where to look, because he has studied the games of other masters.

In this book, grandmaster **Sarhan Guliev** presents a wide range of strategic manoeuvres that have been repeatedly employed by great chess players. He shows how masters generate ideas from the games of other masters:

- positional sacrifices
- amazing counterplay concepts,
- unorthodox exchanges
- winning with g2 - g4 or h2-h4
- overcoming a blockade
- the advantages of double pawns
- the e5 pawn wedge
- the uses of the queen-bishop battery
- and much more.

Winning Chess Manoevres is brimming with interesting and instructive stories about the chess greats, and written in an accessible and entertaining style.

After studying this book, ambitious chess players will find winning strategic manoeuvres quicker and more often. They will not find them by accident or by relying on general principles, but because they have built up a large stockpile of highly practical ideas.

International Grandmaster and FIDE Senior Coach **Sarhan Guliev** won the championship of Azerbaijan three times. He is a highly experienced chess teacher, coach and writer.

"Guliev shows that (grand)masters are standing on the shoulders of the greats from the past. With interesting lessons about the art of the exchange, the positional sacrifice, how to make a plan when you have double pawns, etc. Guliev also points out in which situations you have to do exactly the opposite of what one would expect."
